Important Information About Cloning Your Roster

1. If your team has an official state approved US Club or US Youth roster in GotSport, this is an easy step for you. You simply clone your roster using the above steps and you're done.
2. If your team is registered with a state organization that is not currently using GotSport, you will need to add each player individually to build your roster. The good news is that most tournaments are moving to the new GotSport platform, and you will only need to manually build your roster once.

DO NOT add players, club pass players, or guest players until you have cloned your roster first.

You cannot clone a roster if you have already individually added players and built a roster manually.

Please note, you will NOT see the players listed on the “Roster” tab under the event registration until we approve each player to participate.
